

# Wireless presentation & collaboration solutions for in-person & hybrid meeting rooms

# Transforming meeting spaces using Cynap solutions

When you're looking for a wireless presentation, web conferencing, and collaboration solution for your organisation, look no further than the award-winning Cynap range of AV appliances, the leading systems for in-person and hybrid meeting rooms, and huddle spaces everywhere.

In addition to easy-to-use, app-free, dongle-free, BYOD wireless screen sharing for all iOS, Android, Windows, macOS, and Chrome OS devices, you can also choose your model to include a set of web conferencing and collaboration tools that exactly matches your own individual requirements.

Cynap multi-functional AV systems can either be deployed as an all-in-one AV centrepiece for meeting rooms, or as a high-performance add-on for Zoom or Teams Rooms where wireless presentation and collaboration technology is required to enhance meeting space performance.

Whether you choose a Cynap Pure Mini with its focus on wireless screen mirroring, or a higher specified model with extra functionality, such as whiteboard and annotation, BYOM web conferencing, webcasting or recording, you can be sure of crystal clear 4K UHD on-screen resolution, unrivalled ease of use, and the provision of a collaborative working environment that is second to none.

“

We have been really impressed to see just how much advantage the wireless technology gives us when presenting, when collaborating, and during our workshops, and we see this as a clear advantage for our facility in comparison to other facilities.”

*Mr. Tilman Hampf  
Technical Director,  
ZDI Mainfranken  
Southern Germany*

# Choose your Cynap system!

## CYNAP PURE MINI

### Focus on wireless screen sharing

Outstanding wireless screen sharing from any laptop, smartphone or tablet. Incredibly easy to use. Perfect either as standalone solution for meeting rooms, or as high-performance addition to Teams or Zoom rooms.

## CYNAP PURE

### Presentations made easy

Compact wireless BYOM / BYOD presentation system with all the functionality of Cynap Pure Mini plus additional useful features. Like all Cynap family systems, supports AirPlay, Miracast, and Chromecast for unique app-free, dongle-free wireless screen sharing.

## CYNAP PURE PRO

### Outstanding wireless presentation, web conferencing & collaboration

Ideal add-on to existing infrastructure, with all the functionality of Cynap Pure, plus some of the features of our larger Cynap systems. Provides high performance wireless screen mirroring, together with a range of popular collaboration tools.

## CYNAP CORE PRO

### Advanced collaboration & presentation

'Core essential' collaboration features plus advanced network integration options make this model an ideal centrepiece for mid-sized installations. Also a key component of the vSolution MATRIX multi-workstation solution for training rooms and divisible meeting rooms.

## CYNAP PRO

### All-in-one centrepiece for the modern meeting room

Powerful multi-functional presentation and collaboration system, with media player, web conferencing, recording and streaming, wireless screen sharing, whiteboard, and lots more. Also the 'main station' of the vSolution MATRIX solution.

# Powerful all-in-one hybrid meeting room solutions

## All the collaboration tools you need!

Cynap systems offer high quality wireless presentation of multi-source, digital content, and lots more. Choose from a range of high-performance models with built-in features such as BYOM web conferencing, a media player, integrated web browser, whiteboard and annotation, webcasting and recording, and lots more.

## Easy-to-use BYOM web conferencing

It's easy to host a web meeting wirelessly using any conferencing service directly from your own laptop. Enhance the quality of your hybrid meeting by using the connected camera, microphones, and speaker peripherals already installed in the meeting room.

## Reducing equipment - reducing costs!

Eliminating racks full of AV equipment means reduced costs, as well as fewer potential points of failure. Customisable peripheral device controls can also handle some tasks that would otherwise require a room control system.

## Remote management & updates

vSolution Link Pro software is available free of charge for either on-premise or cloud-based (Microsoft Azure or AWS) virtual server deployment. It facilitates easy remote setup, monitoring, management, and updating of multiple systems across multiple locations.

Sample setup: Cynap Pro system used as the centrepiece of the meeting room for wireless BYOM web meetings and BYOD screen sharing.

# Supporting the modern hybrid workplace!

## Wireless presentation made easy!

Support for AirPlay, Miracast, and Chromecast screen mirroring, using the protocols already built-in to users own devices means that no apps, dongles, or extra software are needed when sharing content wirelessly onscreen in meetings from any smartphone, laptop, or tablet.

## Perfect add-on to Zoom and Teams rooms

Cynap systems often provide the wireless screen sharing option for Zoom/Teams rooms. Content is presented directly into the web conference and automatically displayed on the second display screen, separately from the onscreen remote meeting participants.

## Consistent meeting experience for all!

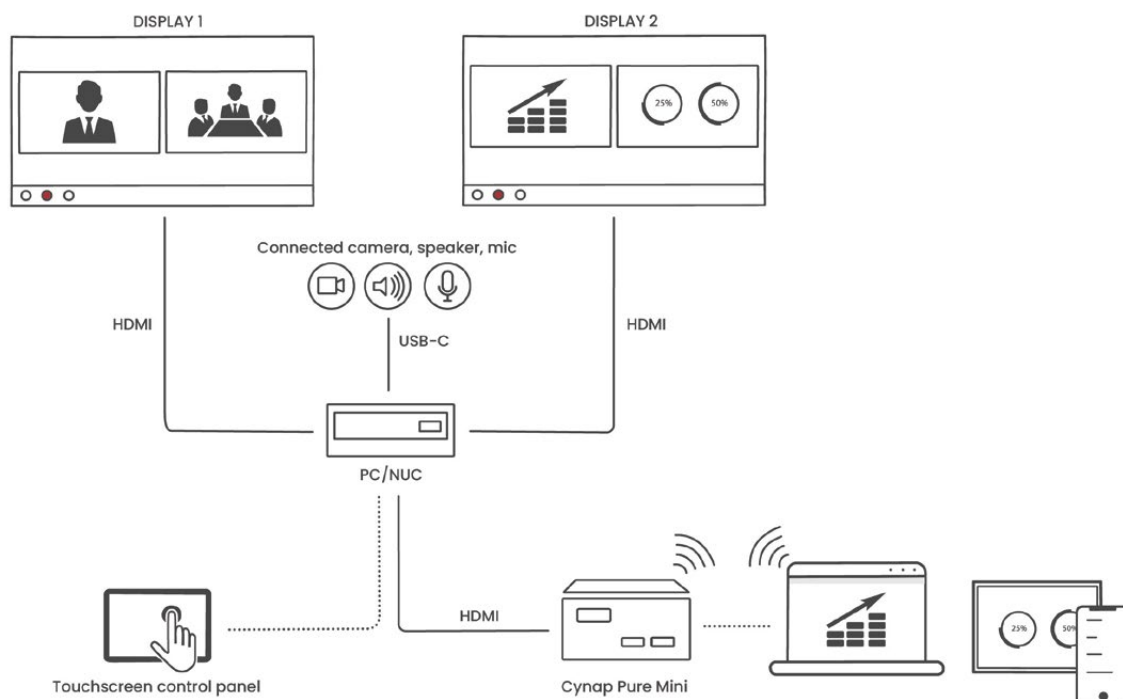

The popularity of hybrid working means that meeting room technology must operate far more flexibly than ever before. Our systems ensure that presentation content materials are always viewable on-screen in a consistent way for both in-room and remote colleagues.

## Enterprise level security

Network security is a key consideration, and our custom-built, closed, Linux system offers 100% wireless data encryption, IEEE802.1x authentication, plus customisable security features to give you exactly the level of protection you require.

Sample setup: Cynap Pure Mini used as a plug-in to a Zoom /Teams room to provide high-performance wireless screen sharing.
