Driving Knowledge Creation

## Cynap PRO Quick Start Guide

# vSolution Cynap PRO by WolfVision - Classic Mode

## Introduction

Cynap PRO by WolfVision® delivers an all-in-one collaboration and presentation solution, featuring BYOD, BYOM, streaming to vSolution Cynap systems, web conferencing, and a document and media player, with support for up to 4K UHD resolution.

## Hardware Connection

Make all necessary connections according to the following typical illustration.

Plug in the power cord as the last step.

Power on the equipment.

## Typical Setup

# Connect and Control - Classic Mode

## Operating for the first time

When the Cynap system is switched on, all settings can be configured in the password-protected settings section of the graphical user interface (GUI). Access the GUI by using a web browser on your connected PC or tablet (input the IP address), by using the remote control\*, or by using a connected USB mouse and keyboard.

Push the  button on the right-hand edge of the Control center and click on the cogwheel.

**Initial admin password to access the settings: Password**  
**Initial SSID of built-in Access Point: model name + serial number of the unit**  
**Initial password of built-in Access Point: serial number of the unit (8 digits)**  
Check the integrated Help Guide for further details.

\* This Cynap PRO system is not automatically supplied with a remote control. If you wish to use the remote control, please check our homepage, or use the direct link <https://bit.ly/3RoAH9I> for further details.

# vSolution Cynap PRO by WolfVision - Composer Mode

## Introduction

Cynap PRO by WolfVision® delivers an all-in-one collaboration and presentation solution, featuring BYOD, BYOM, streaming to vSolution Cynap systems, web conferencing, and a document and media player, with support for up to 4K UHD resolution.

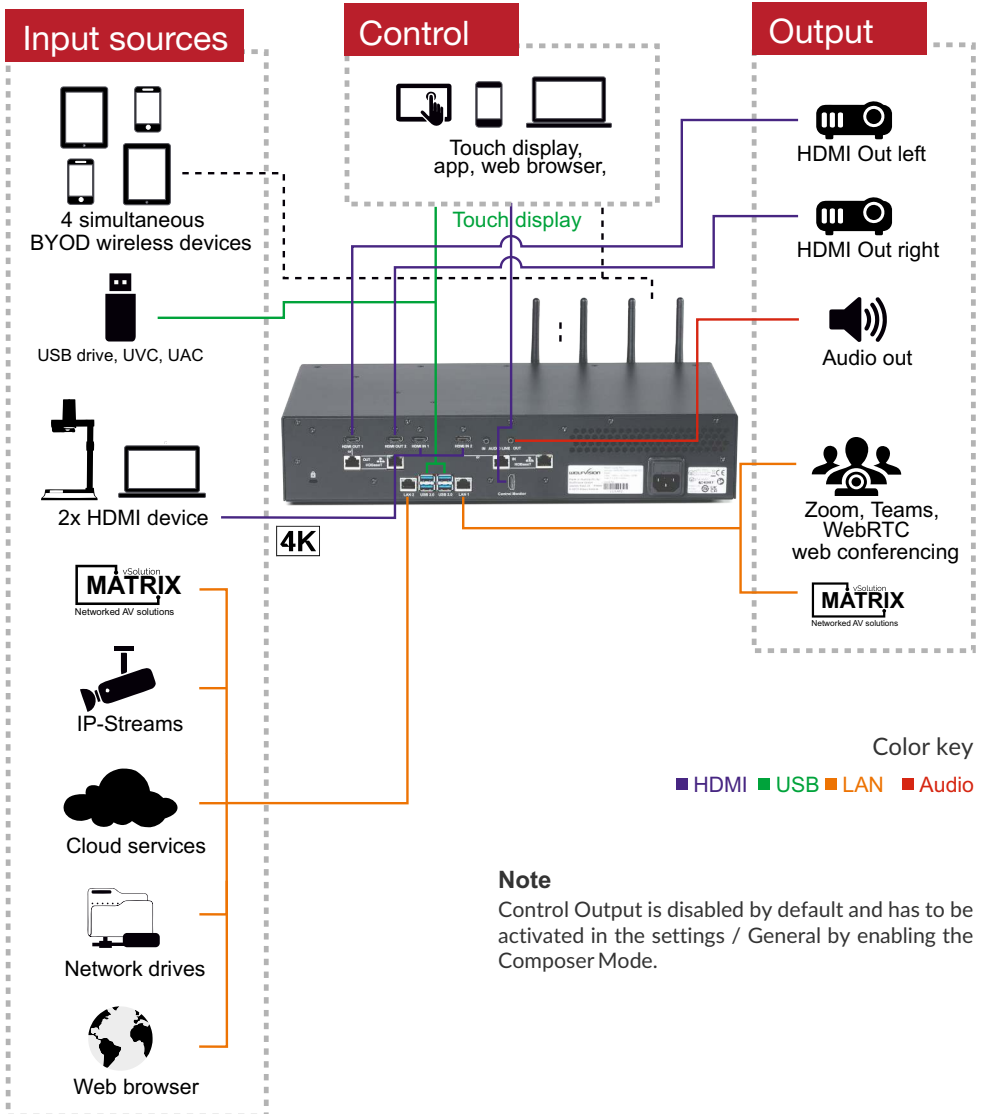

## Hardware Connection

Make all necessary connections according to the following typical illustration.

Plug in the power cord as the last step.

Power on the equipment.

## Typical Setup

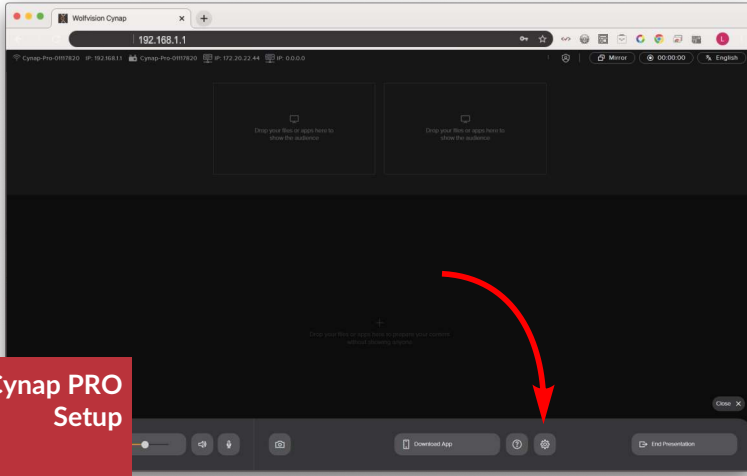

# Connect and Control - Composer Mode

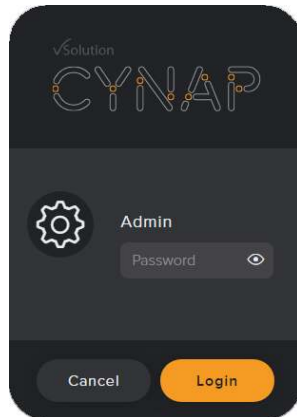

## Composer Mode already activated in the settings

When the Cynap system is switched on, all settings can be configured in the password-protected settings section of the graphical user interface (GUI). Access the GUI by using a web browser on your connected PC or tablet (input the IP address), by using the remote control\*, or by using a connected USB mouse and keyboard.

Push the  button on the right-hand edge to open the Control center and click on the cogwheel.

Cynap PRO  
Setup

**Initial admin password to access the settings: Password**  
**Initial SSID of built-in Access Point: model name + serial number of the unit**  
**Initial password of built-in Access Point: serial number of the unit (8 digits)**  
Check the integrated Help Guide for further details.

\* This Cynap PRO system is not automatically supplied with a remote control. If you wish to use the remote control, please check our homepage, or use the direct link <https://bit.ly/3RoAH9I> for further details.
