

Wireless presentation & collaboration for council chambers & other municipal meeting spaces

Cynap & vSolution MATRIX: Meeting presentation solutions

vSolution Matrix is a networked AV content presentation solution, ideal for use in municipal council chambers. It is easy to install and simple to use. In combination with Wolfvision Cynap systems, it provides a unique and highly-intuitive drag-and-drop interface that makes secure handling and management of onscreen content in municipal environments easier than ever before.

Dedicated encoders and decoders, or complex room control systems are not needed. Users simply route video streams directly between WolfVision's Cynap Pro, and connected Cynap Core Pro or Cynap Pure Receiver devices. Additional screens can also be installed in the room together with a Cynap Pure Receiver as required. Installers simply use an intuitive drag-and-drop interface to create a visual floorplan of the council chamber. The mayor or

city clerk can simply drag and drop signals between the different screens to display materials onscreen as required during meetings.

For smaller installations, the award-winning Cynap product line offers a unique set of possibilities for introducing wireless presentation and collaboration capability into meeting spaces of any size.

“

The ability to share multi-source digital and analog content materials flexibly across multiple screens is an essential requirement of modern city council, school board, and other municipal meetings .”

Mike Swanson,
Regional Sales Manager
WolfVision USA

Choose your Cynap system!

CYNAP PURE MINI

Entry-level wireless screen sharing

Simple wireless screen sharing from any laptop, smartphone or tablet. Easy-to-use, perfect for smaller meeting rooms and huddle spaces, and also an ideal add-on for Zoom/Teams Rooms that require enhanced screen mirroring capability.

CYNAP PURE

Presentations made easy

Compact wireless BYOM / BYOD presentation system with all the functionality of Cynap Pure Mini plus additional useful features. Like all Cynap family systems, supports AirPlay, Miracast, and Chromecast for unique app-free, dongle-free wireless screen sharing.

CYNAP PURE PRO

Outstanding wireless presentation, web conferencing & collaboration

Ideal add-on to existing infrastructure, with all the functionality of Cynap Pure, plus some of the features of our larger Cynap systems. Provides high performance wireless screen mirroring, together with a range of popular collaboration tools.

CYNAP CORE PRO

Advanced collaboration & presentation

Easy to use, providing 'core essential' collaboration features. It is an ideal centrepiece for smaller installations, and can also be used instead of Cynap Pure Receivers as a high-performance component of our vSolution MATRIX multi-screen solution for council chambers.

CYNAP PRO

Centrepiece for modern meeting rooms and council chambers

Powerful 'all-in-one' presentation and collaboration system, with media player, web conferencing, recording and streaming, wireless screen sharing, whiteboard, and lots more. Also the 'main station' of our vSolution MATRIX solution.

 Optional Feature Pack

Digital transformation for city council chambers

Wireless presentation made easy!

Cynap systems support AirPlay, Miracast, and Chromecast screen mirroring, so no apps, buttons, dongles, or extra software are needed, when sharing digital content wirelessly onscreen from any smartphone, laptop, or tablet.

Easy-to-use BYOM web conferencing

It's easy to host a web meeting wirelessly using any conferencing service directly from your own laptop. Enhance the quality of hybrid meetings by using the connected camera, microphones, and speaker peripherals already installed in the council chamber.

Add a Visualizer for display of analog content

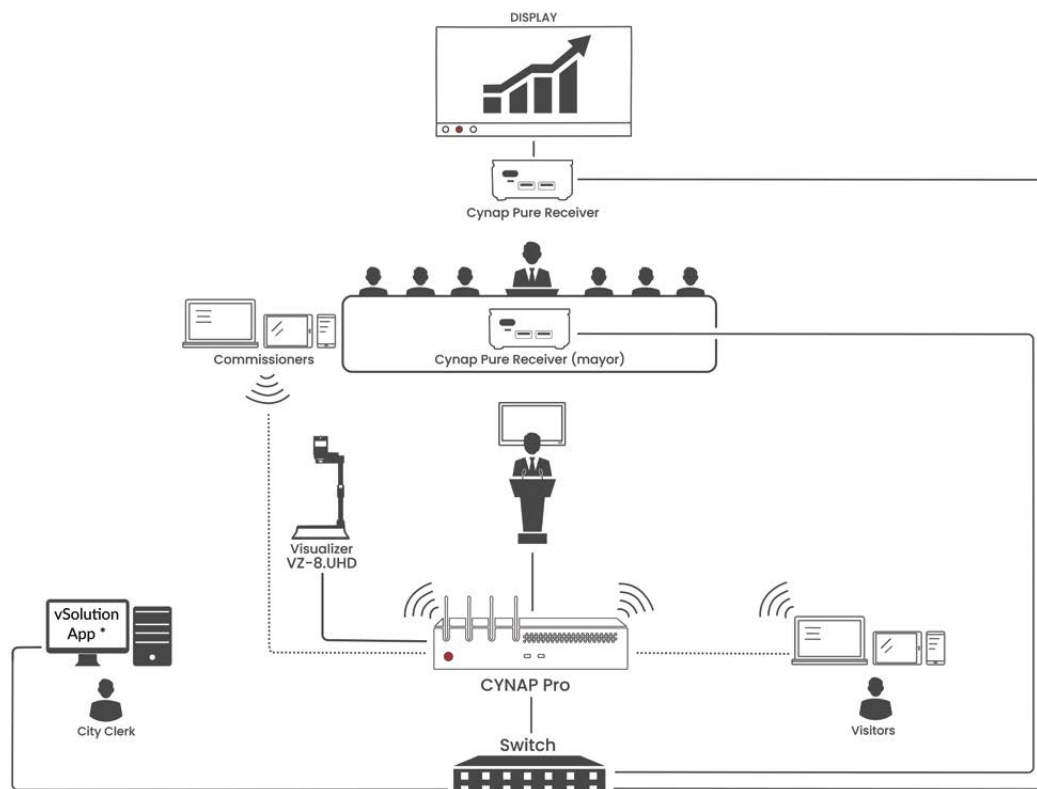

Physical presentation content placed under a WolfVision Visualizer/document camera and enlarged onscreen, helps to enhance meetings. This 'live' content is an integral part of the overall system and can be pushed to any display screen for viewing as required.

Built-in webcasting technology

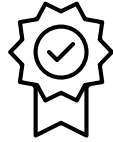

Cynap Pro's multi-functional capability also includes webcasting. This can be used for streaming of council proceedings for 'live' or on-demand viewing, either to a dedicated platform, or to popular channels such as YouTube, Facebook, or others.

Sample setup: vSolution MATRIX enables council members and authorized visitors to wirelessly share content onscreen from any laptop, smartphone or tablet PC. For larger installations, extra screens can be added if required.

Key system advantages

All the collaboration tools you need!

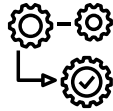

Cynap systems offer high quality wireless presentation of multi-source, digital content, and lots more. Choose from a range of high-performance models with built-in features such as BYOM web conferencing, a media player, integrated web browser, whiteboard and annotation, webcasting and recording, and lots more.

Annotation at the podium

Cynap Pure Receivers support touchscreen annotation functionality which is useful for example on the podium. Council members can strictly control who is authorized to annotate, and when they are allowed to do it, to avoid any disruption to council proceedings.

Remote management & updates

The included vSolution Link Pro remote management software facilitates easy remote setup, monitoring, management, and updating of multiple systems across multiple locations. Firmware updates are free of charge, and there are no recurring license fees.

Maximum security during meetings

Separate networks can be configured for city council personnel and external visitors for maximum network security, and all wireless content is 100% encrypted. After each council session, no information is stored on any WolfVision system.

WolfVision systems offer outstanding BYOD wireless screen sharing capability for all laptops, smartphones and tablets, plus BYOM web conferencing using any service, for council chambers and meeting spaces of any size.
