

vSolution COMPOSER

DUAL SCREEN CONTENT MANAGEMENT

SIMPLIFYING MULTI-SOURCE CONTENT HANDLING

vSolution COMPOSER is available as a FREE upgrade for Cynap Pro. It allows presenters to prepare and view multi-source content on a connected preview screen before dragging and dropping it onto either the left or right-hand main display screen during presentations.

AVAILABLE ON

CYNAP PRO

KEY FEATURES

- **Dual-Screen Presentation Control**
Precise management of content across twin display screens, ideal for larger setups like classrooms, training rooms, or courtrooms.
- **Third HDMI Output for Preview Screen**
Connect a control and preview monitor for easy preparation and content handling before it is displayed to the audience.
- **Drag & Drop Content Management**
Drag and drop content to either the left or right display screen, providing flexibility during live presentations or classes.
- **Web Conferencing Compatibility**
Streamline presentations when hybrid working and learning allowing easy handling of multiple content materials.
- **Panopto Integration**
Seamlessly integrates with Panopto to record multi-source content for on-demand viewing or sharing.
- **Ideal for vSolution MATRIX Setups**
Optimized for AVoIP multi-screen environments, ensuring smooth content distribution across multiple displays.

vSolution **MATRIX**

AWARD-WINNING AV OVER IP
MULTI-SCREEN COLLABORATION SYSTEM

COLLABORATIVE WORKING AND LEARNING MADE SIMPLE!

Flexible, networked AV multi-screen presentation and collaboration system, perfect for active learning spaces, training rooms, and courtrooms. With a Cynap Pro as its centrepiece, it allows high-performance, cost-effective sharing of content between multiple screens and workstations.

AVAILABLE ON

CYNAP PRO

KEY FEATURES

- **Scalable Multi-Screen Content Sharing**
Supports up to 40 workstations, for easy content distribution across multiple screens in working and learning environments of any size.
- **Flexible configuration options**
Cynap Pro acts as a central hub, managing content distribution. Each individual workstation or screen has either a Cynap Core Pro or Cynap Pure Receiver, providing a flexible, budget-friendly solution.
- **Ideal for Active Learning and Hybrid Environments**
Perfect for classrooms or training rooms, enabling participants to interact with content and share materials seamlessly during both in-person and hybrid sessions.
- **Easy Control of Multiple Screens**
Simple drag and drop 'Room View' control interface enables content to be moved effortlessly between different workstations in the room.
- **Courtroom Applications**
Controlled presentation of evidence in both in-person and hybrid sessions, allowing content to be displayed across multiple screens for judges, juries, and attorneys.
